

Technical Working Group Report

Martin Mareš

mj@ucw.cz

August 2009

What does the ITWG really do?

What does the ITWG really do?

- Takes care of the infrastructure:
 - mailing lists
 - dropbox for task submissions
 - internal systems of the ISC
- Maintains the software library.
- Maintains the Practice CD.
- Provides support to HSC and ISC in technical matters.

See more at *<http://ioi.ms.mff.cuni.cz/twg/>*

No major changes since the previous IOI, only maintenance.

Mailing lists:

- **ioi-announce** – low-volume, moderated, **please subscribe**
- **ioi-discuss** – general discussion
- **ioi-ic** – members of the committees
- **ioi-sc**
- **ioi-twg**
- *<http://lists.ioinformatics.org/>*

Original idea: Have an open-source grader for the IOI.

Evolved to: Have a set of software modules available for everybody under a free license.

Modules:

- **sandbox** (ready, used at this IOI)
- **grader** (ready, but pending rewrite)
- **queue** (ready)
- ... and more (see my conference paper)

See more at <http://ioi.ms.mff.cuni.cz/twg/>

Contributions welcome!

Last year, we have created a new Practice CD based on SLAX Linux:

- A live Linux CD (no installation needed)
- Contains most of the development tools available at IOI (some omitted for space reasons, but feel free to ask)
- <http://ioi.ms.mff.cuni.cz/Practice-CD/>

However, we have received no feedback so far.

THE END
