Planning and implementation
- Develop and maintain long term tools and systems
Mailing list, task development tools, ...

The ITC has three main purposes

- Assist the current host
Planning and implementation
- Develop and maintain long term tools and systems
Mailing list, task development tools, ...
- Transferring knowledge and experience to future hosts
Observing three years of HTC and ITC work

The contest was (mostly) onsite again, meaning the ITC role was back to normal.

We helped the host with various minor technical issues.

The contest was (mostly) onsite again, meaning the ITC role was back to normal.

We helped the host with various minor technical issues.

Cooperation with the host worked very well.

Ashar and his team did an **amazing** job!

IOI Tools (available at <https://ioi.github.io/>):

- Sandbox (Isolate)
- Translation system
- Task preparation system
- Contest utilities
- Network management system
- Technical checklist for future hosts
- Task Archive (coming soon)

Contributions welcome

The IOI mailing lists

- **ioi-announce** – low-volume, moderated, **please subscribe**
- **ioi-discuss** – general discussion
- **ioi-training** – connecting organizers of regional training camps with people interested in teaching
- **ioi-ic, ioi-sc, ioi-tc** – members of the committees
- **ioi-ga** – members of the GA, temporary list during the IOI
